

District Engineer

THE POSITION:

TSD is seeking a highly qualified individual to join its leadership team in the position of District Engineer. The ideal candidate will be an experienced engineer, asset manager, and leader motivated to strategically lead the Engineering Department in support of the District's mission of protecting the public health and environment of the Truckee area. The District Engineer supervises professional, technical, and administrative staff and has primary responsibility for the development and management of the District's capital improvement projects, as well as overseeing the review and inspection of all residential, commercial, and industrial developments within the District's boundaries to ensure they are installed in compliance with District standards.

TRUCKEE SANITARY DISTRICT

Truckee Sanitary District (TSD), formed in 1906, is an award-winning public agency responsible for the collection and conveyance of wastewater for the rapidly growing mountain community of Truckee, California, located just 15 minutes from Lake Tahoe. The District owns and operates over 200 miles of sewer mains, 13,000 laterals, 44 pump stations, 4 buildings, and a fleet of over 40 vehicles and equipment. The District's workplace culture is centered on its core values – Safety, Teamwork, Integrity, Communication, and Service.

JOB DUTIES INCLUDE:

- Planning, design, and implementation of Capital Improvement Projects
- Supervision of a staff; including engineers, field inspectors, IT, and the Mechanical & Electrical team.
- Providing support to the District's Operations & Maintenance, Finance, and Administration Departments
- Coordination of District projects with outside agencies
- Review of residential, commercial, and industrial developer projects for compliance with District standards
- Maintenance and updates to the District's technical specifications
- Development of the Engineering Department's annual budget
- Attendance and presentations at monthly Board of Director meetings

QUALIFICATIONS:

- Bachelor's degree in civil engineering or related engineering field and 5 years of professional engineering in the water/wastewater industry including three years in a supervisory or management position.
- Registration as a Professional Civil Engineer in California
- Experience in the design, maintenance, operations, and inspection of gravity sewer collection systems, pump stations, SCADA, and HVAC systems highly desirable.

District Mission:

Protect the public health and the environment while providing its customers the highest level of service consistent with the prudent management of public funds.

Core Values:

Safety
Teamwork
Integrity
Communication
Service
